

Gold As A Remedy!

Gold is a chemical element with symbol Au and atomic number 79. Classified as a transition metal, gold is solid at 25°C.

Gold As An Element-Since ancient time, gold has been used as medicine and it has been a treatment in the past for syphilis. Today, gold is reappearing in treatments for Cancer and Rheumatic arthritis. It is also being used for diagnostic procedures. For example, gold nanoparticles have been used in the diagnosis of malaria. The tests use tiny amounts of gold to identify patients who have malaria less than 20 minutes. These gold particles help to produce a simple colour change to detect the presence of malaria in the patient's blood sample.

Gold does not tarnish unlike many other metals, symbolizing its purity and incorruptibility. It is a regal metal, one that is used to symbolize love and fidelity in the wedding bands. Aurum is the patriarch of the family, the king of the castle. Aurum is honourable, trustworthy and proud.

Gold As In Homeopathy- In the world of homeopathy, when we talk about the homeopathic remedy made from gold Aurum and pronounce it or-um. Aurum is most well known as a treatment for anxiety and depression. However, like all remedies, it has a much broader set of indications than that.

- Synonym: Gold., •Chemical formula: Au
- Prover: Dr Samuel Hahnemann
- Thermals: Chilly, •Miasm: Syphilitic
- Temperament: Melancholy
- Diathesis: Scrofulous.

Doctrine Of Signature-

•**Shining and bright**-Intelligent and hard working, usually reach very high positions.

•**Most Malleable**-Weak mentally and easily discouraged or depressed.

•**Chemically least reactive and combined with selective mental**-Loners. Keep in company or relation with few selected people if something happened to them or to get deceived by them or rejected, Aurum will affect very deeply.

Mental Characteristics-

- Depression and loathing of life dictatorial.
- Self condemnation., •Hardworking.
- Perfectionist., •Responsibility.
- Ambitious, •Relationship, •Religious.
- Sensitive to criticism., •Suicidal tendency.

Adaptability-It is adapted to sanguine, ruddy people with black hair and eyes Pining boys, low spirited, lifeless, lacking in boyish go Old people with heart disease, to person who are low spirited, lifeless and weak memory for constitutions broken down by bad effects of mercury and syphilis.

The main idea essential to Aurum is **Depression And Loathing Of Life**. If you run through the mental symptoms taking them all in as great whole, you will see that all the affections, natural to the healthy man are perverted...

This include a strong dislike for life and feeling tired of living. People with this condition lose interest in everything and feel hopeless. They often blame themselves, feel worthless, and experience deep sadness. This leads them to think about suicide as a way to escape their pain.

Aurum As Child-Aurum as a child often experiences a conditional form of love from parents-love is only given when the child meets their high expectations. As a result, the child learns to give their best in everything, seeking approval and

affection. However, when they fail to meet these expectations, they are punished, which creates a sense of rejection and insecurity. This leads the Aurum child to develop feelings of depression and despair even before reaching adulthood. This emotional strain is one reason why Aurum individuals become workaholic and industrious, as they constantly strive for approval.

Additionally, being the eldest child, they may take on the responsibility of the family at an early age, especially after the death of the father, which adds to their sense of duty and burden.

Industrious-Aurum individuals have a strong inner drive to perform tasks beyond their actual capacity, making them highly industrious, responsible, and conscientious. They hold themselves to strict principles and high standards, often pushing themselves to the point of self-destruction. If they fail to meet their ambitious goals, they experience deep feelings of guilt, failure, and despair. These individuals are often attracted to wealth, not just for material comfort but for the influence, respect, and sense of self-worth it brings. However, if they lose their wealth, they may feel as if they have lost their self-respect entirely, leading to profound depression.

Isolation And Relationship-An Aurum child, from a young age, often receives love from their parents only conditionally or sometimes not at all. This lack of unconditional love causes deep emotional pain, leading them to build a protective barrier around their heart to avoid getting hurt.

In Relationships, Aurum individuals find it hard to open up because they are still affected by their past painful experiences. They may form strong attachments to others but then expect those people to follow their wishes. If the other person resists, Aurum feels heartbroken, which can trigger depression. This heartbreak can feel similar to the pain of losing someone they

love.

Aurum is one of the loneliest types. They are highly sensitive and have a deep fear of rejection. They often feel "abandoned" due to their emotionally distant parents, which leaves them with a constant feeling of being completely alone in the world.

Aurum As A Father-There are two possibilities for Aurum as a father:

•**Devoted Father**: He may become a very devoted father who tries hard to avoid repeating the mistakes his parents made. However, even if he finds a reasonably happy relationship, he may still take out his hidden anger on his children. This anger often stems from the neglect he experienced as a child. Despite having a loving family, he may have sudden bursts of explosive temper. Since he is sensitive and feels deep emotional pain, he often feels very guilty after these outbursts.

•**Repeating the Past**: The other possibility is that he may fall into the same patterns of behavior as his own parents. Aurum men usually grow up feeling the need to prove themselves and may end up pushing their children just as hard as they push themselves.

•**Ambitious**-Parental pressure and to compensate for inner lack of self-worth. Extreme dedication to work leads to rapid career advancement, often reaching executive positions.

•**Sensitive Towards Criticism**-Take others' comments seriously and are highly sensitive. Children of both types respond by withdrawing and hiding their feelings. They share similar emotional traits, but the difference lies in the intensity. Aurum experiences deeper emotions, keeps depression hidden, internalizes self-loathing, and may turn to religious devotion for comfort.

•**Self Contamination**-Aurum, being a syphilitic type, often becomes mentally obsessive, repeatedly dwelling on past traumas, especially when blaming himself.

Frequently tortures himself with

thoughts of regret and remorse when things go wrong.

•**Religious Despair**-Aurum's remorse can manifest as religious despair, believing they are unworthy of salvation (Kent: "he imagines he is only evil").

Some Aurum individuals turn to prayer from an early age as a way to escape their inner mental turmoil, becoming obsessive about it.

They may spend hours praying daily, often with tears, which provides some relief.

Instead of becoming suicidal, religious Aurum types may pray obsessively for salvation especially during deep depression.

Aurum In Family-Aurum individuals have strict ideas of duty, often shaped by parental teachings. Their sense of responsibility is strong, following what they believe they must do. After fulfilling family duties (like educating and marrying off children), they often turn to religious or social service. This shift is driven more by a sense of duty than by genuine sympathy or concern for others.

There are many medicines in Aurum group, they are derived from gold compounds and are primarily prescribed for deep-seated conditions involving depression, cardiovascular issues, and bone affections.

- Aurum arsenicosum (arsenite of gold),
- Aurum bromatum (bromide of gold),
- Aurum iodatum (iodide of gold),
- Aurum metallicum (pure gold),
- Aurum muriaticum (chloride of gold),
- Aurum muriaticum kalium (potassium chloroaurate),
- Aurum muriaticum natronatum (sodium chloroaurate),
- Aurum metallicum nitricum (nitrate of gold),
- Aurum cyanatum (cyanide of gold),
- Aurum sulfuratum (sulphide of gold)
